Round Sequence

1. Solo: select 2 phases. Multiplayer (including 2p): select 1 phase each.
2. Each selected phase needs at least 1 ready pip.
3. Phase selection does not spend pips.
4. Resolve selected phases: Explore, Develop, Settle, Produce, Ship.
5. During each phase, players act in turn order.
6. Spend usable pips or pass.
7. Manage Empire: apply queued Cup recharges, then spend Credits to recharge.

No Roll Dice or Assign Dice step. Score from tableau VP, VP chips, and chosen 6-cost goals.

Explore

1. Scout: spend N Explore pips to search N + 3 candidate tiles of one type.
2. Keep 1 tile and put it in the matching construction area.
3. Take Goal: spend 1 Blue for an extra 6-cost goal—candidate before commit, committed afterward.
4. If both construction areas are full, each Explore pip may Stock for +2 Credits.

Explore is the tempo-cost escape hatch: pips buy search depth or money, but not direct tableau progress.

Scout Lanes

Mining	Rare Worlds, Brown, Mining League.
Novelty	Novelty Worlds, Blue, Free Trade Association.
Genes / Alien	Genes+Green or Alien+Yellow.
Red / NGO	Red grants, gray/Rebel Worlds, New Galactic Order.
Builder / Diverse	Goal cards or missing World colors.

Develop / Settle

- Develop pips may stay as progress on any Development.
- You may complete multiple Developments in one Develop phase.
- Credits are not wild Develop workers by default.
- Every World spends Red equal to cost, plus eligible Yellow for Alien Worlds.
- You may complete multiple Worlds in one Settle phase.
- Normal Worlds may keep Settle progress like Developments.
- On completion, move the tile to tableau and apply converted effects.

Gain Dice

1. Increase that color's max by 1, max 6.
2. Cup: free-recharge at Manage; starting Cup pips begin ready.
3. Citizenry: current does not increase.
4. World: current does not increase; place a Good marker.
5. Excess beyond 6 is lost.

Green 0/2 + Genes die to Citizenry = Green 0/3.

Alien Yellow

- Yellow starts 0/0.
- Gain Alien Technology die: increase Yellow max and apply its printed location.
- Yellow pays only for Alien Develop, Settle, Produce, or Ship work.
- Alternative: Yellow as extra Ship capacity.

Tile Powers / End Game

- Reassign: spend the source pip in an occurring printed destination; its max color and the action result do not change.
- Routed pips do not make a phase eligible for selection.
- Cup gain: max +1, then free-recharge at Manage.
- Citizenry gain: max +1 only.
- World gain: max +1 and place a Good; current does not increase.
- Extra worker: gain 1 temporary pip for that phase.
- Cost reduction: reduce pips required.
- Game ends when a player reaches 12 tableau squares or the VP pool empties.
- Setup: main tracks start 1/1; choose goals first; draft 1 Faction + 1 Home from player count + 2 pools in reverse order; apply printed gains.
- Goals tie to named solo conditions: Novelty, Populace, Alien, Developer, Builder, Industrial, Rare, Production, Military, Diverse.
- Miss a committed goal's minimum: -6 VP.
- No White track; Red settles every World. Credits are unlimited chips.

Spend Pips

Blue	Explore worker.
Brown	Develop worker.
Red	Settle worker for every World.
Green	Produce worker.
Purple	Ship worker.
Credits	Unlimited chips, not a track.

Credits / Recharge

- Credits do not recruit dice.
- Credits are not wild workers by default.
- Trade and some tile effects gain Credits.
- Apply queued Cup-placement free recharges first.
- Spend 1 Credit to recharge 1 current pip during Manage Empire.
- Never recharge above max.
- If your Credit count is 0 after Manage Empire, set it to 1.

Produce / Ship

- Spend Green: place 1 Good on an empty colored World.
- One Good per World unless a power says otherwise.
- Ship: spend Purple to Trade for Credits or Consume for VP chips.
- Trade uses World color: Blue 3, Brown 4, Green 5, Yellow 6 Credits.
- Consume gains exactly 1 VP; there are no color-match bonuses.
- Yellow can Ship Alien Goods in Alien mode.

Color Map

Novelty	Blue
Rare Elements	Brown
Genes	Green
Alien Tech	Yellow
Military	Red
Consumption	Purple

Solo Setup

1. Use one normal player setup.
2. Set Dummy Goods to 0.
3. Shuffle 5 Dummy phase cards.
4. Choose one campaign sheet.
5. Use a 24 VP-chip pool: you + Dummy.
6. Play exactly 20 rounds.

Score Conditions

Easy **Great 22, Triumphant 26, Epic 30, Named 24.**

Normal **Great 32, Triumphant 36, Epic 40, Named 32.**

Advanced **Great 38, Triumphant 42, Epic 46, Named 38.**

Very Hard **Great 44, Triumphant 48, Epic 52, Named 44.**

Industrial max pips: 7 / 9 / 11 / 14 by difficulty.

Named Conditions

- Builder: Gal. Renaissance and complete 7+ tiles.
- Developer: Gal. Federation and have 4+ Developments.
- Colonizer: Named VP and have 5+ Worlds.
- Satisfied Populace: Gal. Bankers and ship 4+ Goods.
- Industrial: Gal. Reserves and difficulty's max-pip target.
- Production: New Economy and have 3+ production Worlds.
- Diverse: System Diversification and have 4+ World colors.
- Novelty: Free Trade Association and have 2+ Novelty Worlds.
- Rare Elements: Mining League and have 2+ Rare Worlds.
- Alien Contact: Galactic Exchange and have 1+ Alien World.
- Military: New Galactic Order and Red max 3.
- Discovery: Named VP and Blue max 3.

Dummy Effects

- Explore: claim 1 Development and 1 World.
- Develop: claim 1 Development.
- Settle: claim 1 World.
- Produce: Dummy Goods +1, max 4.
- Ship: set Dummy Goods to 0.

Campaign Sheets

Outreach **Great, Colonizer, Builder/Gal. Renaissance, Discovery.**

Industrial Base **Triumphant, Developer/Gal. Federation, Industrial/Gal. Reserves, Production/New Economy.**

Sector Survey **Great, Diverse/System Diversification, Novelty/FTA, Rare/Mining League.**

Alien Contact **Triumphant, Alien/Gal. Exchange, Diverse/System Diversification, Discovery.**

Mastery **Epic, Military/New Galactic Order, Industrial/Gal. Reserves, Populace/Gal. Bankers.**

Solo Round

1. Select 2 phases, each with at least 1 ready pip.
2. Phase selection does not spend pips.
3. Reveal 2 Dummy phase cards.
4. Resolve selected phases in normal order.
5. Spend usable pips or pass.
6. Resolve Dummy effects for Dummy phases.
7. Manage Empire, then check 6-cost goal commit.
8. If still uncommitted, commit a goal after round 10.

Campaign Play

1. Play 4 games in a row.
2. Select the matching 6-cost goal for the campaign condition attempted.
3. After each game, mark 1 satisfied unmarked condition.
4. Marked 6-cost conditions require the matching committed goal.
5. If you cannot mark a new condition, lose the campaign.
6. Mark all 4 conditions to win.

Solo End

- Round limit is reached.
- Your tableau reaches 12 squares.
- Campaign 6-cost conditions require the matching committed goal.
- Miss a committed 6-cost goal's minimum: -6 VP.
- Finish the round, then mark 1 campaign condition.

Explore

DUMMY PHASE

Add Explore to the selected phases.

Dummy effect: claim 1 Development and 1 World face down.

Develop

DUMMY PHASE

Add Develop to the selected phases.

Dummy effect: claim 1 Development tile face down.

Settle

DUMMY PHASE

Add Settle to the selected phases.

Dummy effect: claim 1 World tile face down.

Produce

DUMMY PHASE

Add Produce to the selected phases.

Dummy effect: Dummy Goods +1, max 4.

Ship

DUMMY PHASE

Add Ship to the selected phases.

Dummy effect: set Dummy Goods to 0.

Max Markers

Use max markers for phase tracks. Red is the Settle track for every World.

MAX	MAX	MAX	MAX	MAX	MAX
MAX	MAX	MAX	MAX	MAX	MAX
MAX	MAX	MAX	MAX	MAX	MAX
MAX	MAX	MAX	MAX	MAX	MAX

Setup Strip

Place beside each player mat.

Blue 1/1	Brown 1/1	Red 1/1	Green 1/1	Purple 1/1
Credits 1	Yellow 0/0	Apply printed gains	Max 6	Credits unlimited
VP + chips + goals	VP pool 7 per player	Free recharge 0	Yellow: Alien
