PLAYER 4

Start: roll 3 White; 2 White in Citizenry.

Opponent call: you activate the same bowl.

Goals: candidates ____ / ____; committed ____.

Roll & Sow Quick Reference

1-4 PLAYERS • PROTOTYPE

Setup

1. Reveal players + 2 six-cost goals; mark 2 candidates each.
2. Then use normal Faction and Home World setup.
3. Roll 3 White dice into their face bowls.
4. Put 2 White dice in Citizenry.
5. Start with 1 Credit and one build of each type.
6. VP pool: 7 chips per player.

Round

1. Secretly select one nonempty bowl.
2. Reveal; add the 2p supply-die phase.
3. Resolve selected phases I → V.
4. Everyone activates that phase's bowl.
5. Spend any dice; sow every unused die.
6. Manage Empire: recruit; Recall 1 if all bowls empty; check goals.

Activate the bowl first. Use dice as costs. Sow every die you do not use, starting in the next bowl clockwise.

Phase Actions And Used-Die Destinations

Explore	Spend N: inspect N+3 tiles; keep 1. Or spend 1 to Stock for 2 Credits or Claim an extra goal.	Citizenry
Develop	Each die adds 1 permanent progress to any Development. Multiple builds may complete.	On build → Citizenry
Settle	Each die adds 1 permanent progress to any World. All Worlds use printed cost.	On build → Citizenry
Produce	Each die becomes a Good on an empty non-gray production World.	World as Good
Ship	Each die ships 1 Good: Trade for 3/4/5/6 Credits or Consume for 1 VP.	Both → Citizenry

Sowing

- First unused die goes in the next phase bowl.
- Continue clockwise, one die per bowl.
- Wrap around as often as needed.
- Choose the order of differently colored dice.
- A die sown into a later selected bowl acts this round.

Printed Die Locations

Cup gain	Roll now into its face bowl.
Citizenry gain	Recruit later for 1 Credit.
World gain	Place as a Good; do not roll.
Wild face	Choose any bowl.
Reassign	Move a legal die before reveal.

Explore Discard Cycle

- Draw physical tiles and inspect both sides.
- Keep one chosen side under construction.
- Discard every rejected tile face down.
- When the bag runs short, shuffle discards into it.
- Maximum: 3 Developments and 3 Worlds queued.

Tile Powers

- Use normal text when its concept still exists.
- Extra workers are virtual and are never sown.
- Cost reductions reduce progress required.
- Phase-end powers trigger whenever the phase occurs.
- Backup Planning = one unrestricted Reassign.

Provisional Solo

- Use a 24-chip pool and a 20-round limit.
- Select one nonempty bowl.
- Reveal one card from a five-phase deck.
- Both phases occur; matching phases occur once.
- Reshuffle after all five cards are seen.

Goal Commitment

- Trigger: half the VP pool gone or anyone completes 6 tiles.
- Commit 1 candidate; later claimed goals commit immediately.
- Fulfill the goal minimum to score its printed bonus conversion.
- Miss the minimum: -6 VP per committed goal.
- Goals grant no phase power, face VP, or tableau square.
- End at 12 tableau squares or empty VP pool; score normal VP + goals.

Playtest Notes

Rounds / phases per round:

Best forced activation:

Did sowing create a future plan?

Resources too tight / right / loose:

Committed goal / fulfilled / VP:

Free Trade Association

SIX-COST GOAL

Minimum: 2+ Novelty Worlds

Bonus: half the total cost of your Novelty Worlds, rounded up.

The goal is not built and grants no Ship-phase power.

Candidate ☐

Committed ☐

Miss: -6 VP

Galactic Bankers
