Red = level

White = Credits

Start: phase colors 2/2, Red 2, White 1, Yellow 0/0

Round Sequence

- 1. Select one phase secretly.
- 2. Reveal selected phases.
- 3. Resolve selected phases in order.
- 4. Manage Empire: spend Credits to recharge.

No Roll Dice or Assign Dice step. VP pool: 8/player at 2p, 12/player at 3p+.

Spend Pips

- Blue Explore worker.
- Brown Develop build currency.
- Red Military level; not spent.
- Green Produce worker.
- Purple Ship worker.
- White Credit track.

Explore

- 1. Scout: spend 1+ Explore pips to search that many candidate tiles of one type.
- 2. Keep 1 tile and put it on the bottom of that build stack.
- 3. If both build stacks already have tiles, each Explore pip may Stock for +2 Credits.

Explore is the tempo-cost escape hatch: pips buy search depth or money, but not direct tableau progress.

Scout Lanes

- Mining Rare Worlds, Brown, Mining League.
- Novelty Novelty Worlds, Blue, Free Trade Association.
- Genes / Alien Genes+Green or Alien+Yellow.
- Military Red grants, Rebel Worlds, New Galactic Order.
- Builder / Diverse 6-cost Developments or missing World colors.

Develop / Settle

- Pay the top tile's full cost in one shot.
- Develop uses Brown pips and/or Credits.
- Military Worlds require Red level at least equal to cost; Red does not spend down.
- Normal Worlds use Credits, plus eligible Yellow for Alien Worlds.
- If you cannot pay the full cost, spend nothing and keep the tile queued.
- On completion, move the tile to tableau and apply converted effects.

Credits / Recharge

- Credits do not recruit dice.
- Credits pay Develop and normal Settle costs.
- Spend 1 Credit to recharge 1 current pip during Manage Empire.
- Never recharge Red, White, or above max.
- If your Credit marker is at 0 after Manage Empire, set it to 1.

Gain Dice

- 1. Increase that color's max by 1, max 6.
- 2. Increase current by 1, not above max.
- 3. Excess beyond 6 is lost.

Green 0/2 + Genes die = Green 1/3.

Produce / Ship

- Produce: place a Good marker, not a worker die.
- The Good color is the pip color spent.
- Ship: spend Purple to Trade or Consume.
- Yellow can Ship Alien Goods in Alien mode.

Alien Yellow

- Yellow starts 0/0.
- Gain Alien Technology die: pip up Yellow.
- Yellow pays only for Alien Develop, Settle, Produce, or Ship work.
- Alternative: Yellow as extra Ship capacity.

Color Map

- | | |
|---------------|------------------|
| Home | Starting Credits |
| Novelty | Blue |
| Rare Elements | Brown |
| Genes | Green |
| Alien Tech | Yellow |
| Military | Red |
| Consumption | Purple |

Tile Powers / End Game

- Ignore reassign powers.
- Gain/recruit/place die: pip up that color.
- Extra worker: gain 1 temporary pip for that phase.
- Cost reduction: reduce pips/Credits required.
- Game ends when VP pool is exhausted or a player reaches 12 tableau squares.
- 6-cost bonuses use converted battery scoring.
- White counts only as Credits, not owned dice, unless a bonus says Credits.

Solo Setup

1. Use one normal player setup.
2. Use a 30 VP chip pool.
3. Set Dummy Goods to 0.
4. Shuffle 5 Dummy phase cards.
5. Choose one campaign sheet.
6. Play exactly 12 rounds.

Score Conditions

Easy **Great 23, Triumphant 30, Epic 36, Named 24.**

Normal **Great 31, Triumphant 36, Epic 42, Named 32.**

Advanced **Great 36, Triumphant 42, Epic 48, Named 36.**

Very Hard **Great 42, Triumphant 48, Epic 54, Named 40.**

Industrial max pips: 12 / 14 / 15 / 16 by difficulty.

Named Conditions

- Builder: Named VP and complete 8+ tiles.
- Developer: Named VP and have 5+ Developments.
- Colonizer: Named VP and have 6+ Worlds.
- Satisfied Populace: Named VP and score 11+ VP chips.
- Industrial: Named VP and difficulty's max-pip target.
- Production: Named VP and have 4+ production Worlds.
- Diverse: Named VP and have 4+ World colors.
- Novelty: Named VP and have 2+ Novelty Worlds.
- Rare Elements: Named VP and have 2+ Rare Worlds.
- Alien Contact: Named VP and have 1+ Alien World.
- Military: Named VP and Red level 4.
- Discovery: Named VP and Blue max 4.

Dummy Effects

- Explore: claim 1 Development and 1 World.
- Develop: claim 1 Development.
- Settle: claim 1 World.
- Produce: Dummy Goods +1, max 4.
- Ship: drain 2 VP chips per Dummy Good, minimum 2.

Campaign Sheets

Outreach **Great, Colonizer, Builder, Industrial.**

Industrial Base **Triumphant, Developer, Industrial, Production.**

Sector Survey **Triumphant, Diverse, Novelty, Rare Elements.**

Alien Contact **Triumphant, Alien Contact, Diverse, Discovery.**

Mastery **Epic, Novelty, Rare Elements, Military.**

Solo Round

1. Select your phase.
2. Reveal 2 Dummy phase cards.
3. Resolve all selected phases in order.
4. Resolve both Dummy card effects.
5. Manage Empire normally.

Campaign Play

1. Play 4 games in a row.
2. After each game, mark 1 satisfied unmarked condition.
3. If you cannot mark a new condition, lose the campaign.
4. Mark all 4 conditions to win.

Solo End

- Round limit is reached.
- VP chip pool is exhausted.
- Your tableau reaches 12 squares.
- Finish the round, then mark 1 campaign condition.

Explore

DUMMY PHASE

When revealed, Explore is selected this round.

Dummy effect: claim 1 Development and 1 World face down.

Develop

DUMMY PHASE

When revealed, Develop is selected this round.

Dummy effect: claim 1 Development tile face down.

Settle

DUMMY PHASE

When revealed, Settle is selected this round.

Dummy effect: claim 1 World tile face down.

Produce

DUMMY PHASE

When revealed, Produce is selected this round.

Dummy effect: Dummy Goods +1, max 4.

Ship

DUMMY PHASE

When revealed, Ship is selected this round.

Dummy effect: drain 2 VP chips per Dummy Good, or 2 if empty.

Max Markers

Use max markers for phase tracks. Red marker shows Military level.

MAX	MAX	MIL	MAX	MAX	MAX
MAX	MAX	MIL	MAX	MAX	MAX
MAX	MAX	MIL	MAX	MAX	MAX
MAX	MAX	MIL	MAX	MAX	MAX

Setup Strip

Place beside each player mat.

Blue 2/2	Brown 2/2	Red 2 Military	Green 2/2	Purple 2/2
White 1 Credit	Yellow 0/0	Max 6	Credit max 6	VP 8/player at 2p
VP 12/player at 3p+	Free recharge 0	Yellow: Alien
